

Kate Labs Announces Frame 1.2 for Mac OS X and Windows

FOR IMMEDIATE RELEASE

Helsinki, Finland – October 20, 2009 – Kate Labs announced Frame 1.2 application for Mac OS X and Windows. The application delivers comprehensive features for testing digital imaging devices.

The update is available immediately. The update is free of charge for the existing users. The new users can download the 14-day free trial prior to purchase. The price of a single user license is 99€.

The update includes several remarkable additions and improvements. The update adds the support for reference files in CSV and ANSI IT 8.7 compatible format. The support for the reference files allows both the users and the vendors of the test charts to define the references of the test chart in RGB, XYZ, and LAB color spaces.
